Estimated Taxi-in Time
- EIBT
Estimated In-Block Time
- MTT
Minimum Turn-round Time
- EOBT
Estimated Off-Block Time
- TOBT
Target Off-Block Time

Turn-round Management (Automatic TOBT calculation)

The Target Off-Block Time (TOBT) calculation is performed automatically by the A-CDM platform on the basis of the current informations related to the linked arrival flight and taking into account the Taxi Time and the Minimum Turn-round time stated by the carriers.

In any case the TOBT will be equal or more than the SOBT and shall be compliant with the EOBT of the ATC flightplan
